A NEW BRIDGE BILL

A new bridge bill has been drafted to take the place of the New York and New Jersey Bridge bill vetoed by the It will probably be acted upon by the Commerce Committee of the House early next week, and is not expected to meet with any serious opposition, either in the House or the Senate.

The new bill is carefully drawn. It mits the provision authorizing the construction of piers in the river, and meets all the objections made by the Presi dent to the former bill.

It is not easy to understand how any body can oppose a measure of such vast importance to the commerce of the country, the interests of the city of New s occasioning less speed to rapid transit York, and the convenience and accomdelayed, will be started early this year.
